# Accident and illness management made easy

The UKA Connect software developed by HRM Systems AG enables companies to manage their accident and illness administration efficiently.

Accident and illness insurance cases

- Administration of accident and illness incidents
- Integration of UKA Send so that employees may submit their accident reports electronically to the HR department
- Electronic transmission of case reports incl. medical certificates and documents to the insurer

Integration of Abacus and MyAbacus

- Automatic synchronisation of employees' master data and wage data as well as company data and insurance contracts
- Direct access to MyAbacus without a separate login
- Incident overview and information in MyAbacus

Security and performance

- UKA Connect is a browser-based software as a service solution
- HRM Systems, as an operator, is ISO 9001, ISO/IEC 27001 and ISO/IEC 27701 certified
- The software operates in Switzerland, in a dedicated environment
- The data centres and backups are ISO 9001 and ISO/IEC 27001certified and fully operated in Switzerland
- Accesses are protected by firewall and SSL encryption

Requirements

- Abacus version 2022 R2 and higher
- MyAbacus incl. company subscription medium
- Also, in 2025, SAP integration
